

Support for Bereaved Families

Grief caused by the loss of a newborn due to stillbirth is challenging and the experience is unique for every family. You planned for a different outcome – and the physical and emotional ups and downs could seem daunting.

Your grieving journey is personal. But you don't have to go through it alone.

Family Connects NJ is a new program that serves all families experiencing the tragedy of a stillbirth, or loss of their newborn, including individuals who may not have carried the baby.

What is Family Connects NJ?

Family Connects NJ offers a free and voluntary nurse visit in the comfort of your own home to assist you with:

- ✓ **Screening for postpartum health issues** that could be otherwise overlooked.
- ✓ **Linking you and your family to resources** that can assist with your emotional wellbeing, such as ongoing grief counseling, behavioral health assistance, or support groups.
- ✓ **Connecting you to other community resources** you might want or need.

Visit FamilyConnectsNJ.org or scan the QR code to learn more about the program, its benefits, and to sign-up for a free visit.
